Moderator

2024 - Present

Google Developer Student Club

Team Member

2022 - 2023

Kocaeli University - IT Club

Board Member

2021 - 2022

• Linknown

Technologies: Node.js, Next.js, MongoDB, AWS EC2

A fullstack e-commerce platform built using Next.js and Node.js, designed to manage products, categories, user accounts, and cart operations. Implemented secure authentication, server-side rendering for SEO, and a scalable backend API hosted on AWS EC2. The project focuses on performance, clean UI, and a fully responsive design.

🌐Website

Note: The backend server is currently inactive.

• VB Ecommerce

Technologies: Angular, ASP.Net, MySQL

An e-commerce site developed to enhance my skills in ASP.NET, Angular, and MySQL, featuring dynamic admin control panels managing categories, products, likes, and cart operations.

🌐Frontend 🌐Backend

• Laptop Ecommerce

Technologies: React, Node.js, Express.js, MongoDB

A MERN stack e-commerce site. This was my first fullstack project developed in the software laboratory class.

🌐GitHub

• KOU Statistics Sample Design

Technologies: React.js

A statistics page developed in the school laboratory using React.

🌐GitHub

• Ask Olsun - Love App

Technologies: React.js, MongoDB

A love-themed website developed using Next.js to learn SEO.

🌐Website

• ILKKA Homepage Template

Technologies: Next.js, Tailwind CSS

A sample homepage design for a technology company.

🌐GitHub 🌐Website

• Text Processor

Technologies: React.js, Java Spring Boot, MongoDB

A site that combines user texts based on similarity and saves them to a database.

🌐GitHub

• Semantic Split Web Application

Technologies: Next.js, Django

A web interface that groups sentences based on their meaning.

🌐GitHub

• Plane Selector

Technologies: Next.js, React.js, React Suite, Tailwind CSS

A web application that allows flight searches by entering departure and arrival information.
